கால்நடை மருத்துவக் கல்லூரி குறித்து.

Statement under rule 82

MR. SPEAKER : The Hon. Minister for Health will now make a statement under rule 82 of the Assembly Rules.

* THE HON. THIRU K. ANBAZHAGAN : Mr. Speaker, Sir, with your permission, I wish to make the following statement in the House.

Even though the Veterinary College was officially closed on the 28th of March 1972, the academic programmes and training for the B.V. Sc. students were continued beyond the date, for example (a) facilities were provided to write the University Examination for the regular April batch students numbering 489, (b) facilities were provided for the October batch of students numbering about 249 for continuing their farm training which is part of their curriculum at the various farms during the summer vacation. But the students did not avail of the opportunity. On the other hand they have stated that they will not come to the college or write the examination unless the parity of pay is announced by the One-Man Commission.

The Government is still however keeu in helping the students to pursue their academic programme. The University has permitted all the students who have registered for the April 1972 examination to re-appear for the next examination without another application and payment of fees. The next examination is scheduled to be held from September 15, 1972. The Government

will provide all facilities for the above 489 students including hostel accommodation if required from September 1, 1972 to get themselves ready for the examination on September 15th, on condition that the students send a letter of joint declaration by parent and candidate that they will not involve themselves in any activities that will be considered as indiscipline as per rules and regulations of the institution.

The Government will further make arrangements for completion of the farm training which is a part of their curriculum for the 249 October batch of students during September 15th to December 15th in two batches and when the farm training is over they can have the additional one term requirements of academic training in the college during January to March 1973 and be eligible for their next University Examination which will commence from 1st April 1973. Here again, the parents and students should send in their declaration in the printed form that will be made available at the college. This is necessary so that the authorities can get ready for giving the farm training.

It is the students' responsibility however to request the University Authorities to conduct the examination from September 15, 1972. Otherwise the University may be under the impression that the students will continue to boycott the examination and they would not be prepared to make preliminary arrangements for conducting the examination on September 15th.

The question regarding the pay is a separate issue and it has been referred to the One-Man Commission and it may take its own time and these two should not be clubbed along with the academic programme of students.

As regards the new admissions in 1972, the Government feels that the admissions will go on with immediate effect. Students who are selected will be intimated by registered post and they will be admitted from 16th August and classes will commence from the 21st or 22nd August 1972.
